

commands:

telnet or frontpanel c50 with 9600baud

chd /f0/eagle

vi etcsload

press enter down to second line so cursor blinks there

type "i" (not quotes)

type "route delete default"

press enter

Code should now look like this:

```
/f0wp/cmds/ipstart
```

```
route delete default
```

```
/f0wp/eagle/tcpio -u ^5700 <>>>/nil &
```

```
/f0wp/eagle/video_detect ^6000 <>>>/nil &
```

press up arrow

type :wq

after it writes it out it should return with

"etcsload" 4 lines, 120 characters

reboot

to check:

chd /f0/eagle

list etcsload to be sure code has taken

```
$ vi etcsload
```

```
"etcsload"
```

```
"etcsload" 3 lines, 99 characters
```

```
Insert mode
```

```
:wq
```

```
"etcsload"
```

```
/f0wp/cmds/ipstart
```

```
route delete default
```

```
/f0wp/eagle/tcpio -u ^5700 <>>>/nil &
```

```
/f0wp/eagle/video_detect ^6000 <>>>/nil &
```

```
~
```

```
~
```

```
~
```

```
~
```

```
~
```

```
~
```

```
~
```
